#### Very difficult

Anonymous (not verified) | Wed, 2009-01-28 20:24

It will be very difficult if not impossible to convict this man of anything without a body. No body, no crime. What are they gonna convict him with? Dissapearing is not a crime. And they can't even prove that he was the magician that made her dissappear. This is what happens when you rush and have no evidence. You weaken your case. That's what the procecutors have done.
